CANTESCO RETURNS TO USING PLASTIC DRUMS

Return to UN approved high density drums saves users time and money

As part of our continual product improvement process Cantesco has returned to a UN approved plastic drum in place of the previously used metal drums.

One of the reasons is that the cost of steel has increased

HOW TO REACH US

In the US: (716) 693-8206 ph
(716) 693-8373 fax
In Canada: (905) 624-5463 ph
(905) 624-2840 fax

dramatically over the last couple of years while the cost of plastic has not. This switch will allow Cantesco to remain price competitive.

In addition the recycling of metal drums normally requires the drum heads to be removed for cleaning purposes, rendering the drum unusable as a refillable container. Metal drums can only then be used as scrap metal.

Lastly plastic drums are more forgiving with respect to potential handling damages from minor bumps or scrapes.

Cantesco Corporation manufactures chemical specialty products for welding, transportation, industrial,

consumer and water treatment products.
