CANTESCO®
welding chemical products

CANTESCO® Quick Protect Anti-Spatter is a fast-drying protective coating based on natural plant-based oils dissolved in a liquified gas blend that evaporates immediately upon spray-out allowing you to apply protection where needed without drips. Designed to match the performance of time-tested solvent based formulations, CANTESCO® Quick Protect Anti-Spatter provides heavy duty performance without the health and regulatory concerns associated with methylene chloride.

FEATURES AND BENEFITS

- Ready to use aerosol
- Non-toxic & biodegradable
- No chlorinated solvents
- Dries instantly

CANTESCO® Quick Protect Anti-Spatter is heat resistant for high temperature applications, and provides a uniform coating that prevents spatter build up on MIG nozzles, tips, fixtures and materials during welding applications. The coating is non-toxic, non-irritating, and readily biodegradable.

The CANTESCO® Quick Protect Anti-Spatter provides heavy duty performance without the health and regulatory concerns associated with methylene chloride.

The Quick Protect Anti-spatter formulation is free from dense, harmful, chlorinated solvents. As a result, the can feels lighter, making it more convenient to handle during application. Although the coating let down during spray out remains the same, the spray distance has been reduced from 12 inches to 8 inches.

CANTESCO® Quick Protect Anti-Spatter is available in a ready to use aerosol form. Shelf life for this product is five years from date of manufacture. Product is available by contacting sales@cantesco.com

ITEM	CODE	SIZE	QTY
QP-16-A	699913-14190	16oz aerosol can*	12 cans per box

*All aerosols filled to container safe capacity based on product characteristics.
