

## TECHNICAL INFORMATION - TYPICAL ANALYSIS

# ANTI-SPATTER

**PRODUCT** CANTESCO® QUICK PROTECT ANTI-SPATTER

**APPLICATION** CANTESCO® QUICK PROTECT ANTI-SPATTER is a fast-drying protective coating based on natural plant-based oils dissolved in a liquified gas blend that evaporates immediately upon spray-out. The coating is heat resistant for high temperature applications. Material provides a uniform coating that prevents spatter build up on MIG nozzles, tips, fixtures and materials during welding applications. The coating is non-toxic, non-irritating, and readily biodegradable.

**COMPOSITION** CANTESCO® QUICK PROTECT ANTI-SPATTER is a plant-oil based formulation dissolved in a liquified gas propellant. Does not contain any silicone materials or chlorinated solvents.

The Quick Protect Anti-spatter formulation is free from dense, harmful, chlorinated solvents. As a result, the can feels lighter, making it more convenient to handle during application. Although the coating let down during spray out remains the same, the spray distance has been reduced from 12 inches to 8 inches.
